+91 98441 36001 | suchendra018@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

Results-driven Information Science Engineering student with practical experience in Full Stack Development, Machine Learning, and Data Science. Skilled in building scalable web applications, implementing AI solutions, and solving real-world problems through software engineering. Currently pursuing advanced learning in Machine Learning, Generative AI, and modern software development technologies.

EDUCATION

Cambridge Institute of Technology, Bengaluru Bachelor of Engineering in Information Science and Engineering CGPA: 9.17	2023 – Present
Amara Jyothi PU College, Mulbagal, Kolar PUC (PCMB) – Percentage: 88.16	2023
Morarji Desai Residential School, Mulbagal, Kolar SSLC – Percentage: 93.6	2021

EXPERIENCE TRAINING

Samsung Innovation Campus (SIC)	Ongoing
- Undergoing technical training in Machine Learning, Neural Networks, Model Evaluation, and Data Science concepts. - Gaining practical exposure through structured coursework, case studies, and hands-on AI implementation projects.	
Samsung PRISM	
- Collaborating with a team under Samsung engineer mentorship to solve real-world technical challenges. - Participating in research, experimentation, and software development activities.	

PROJECTS

Employee Payroll Management System

Tech Stack: HTML, CSS, JavaScript, MySQL

- Developed a web-based payroll management system to automate employee attendance tracking and salary processing.
- Implemented secure administrator controls, employee management features, and payroll report generation.

Real-Time Chat Application

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT

- Built a real-time messaging platform with secure JWT-based authentication and authorization.
- Developed REST APIs and responsive user interfaces for seamless communication between users.

Aegis AI Scam Detection Application

Tech Stack: Android Studio, Java, Machine Learning

- Developed an Android application during the Aegis AI Cybersecurity Hackathon to identify fake investment applications, malicious APKs, and potentially harmful mobile applications.
- Implemented AI-based risk analysis and APK scanning mechanisms to detect suspicious behavior and help users avoid financial fraud and cybersecurity threats.

F1-MapFeed

Tech Stack: Python, FastF1, Pandas, Matplotlib, Flask

- Developed a Formula One telemetry visualization platform capable of streaming historical race telemetry and map feeds.
- Processed and analyzed racing datasets to provide detailed performance insights and driver tracking visualizations.

TECHNICAL SKILLS

- **Programming Languages:** C++, Java, Python, JavaScript
- **Frontend Technologies:** HTML, CSS, React.js
- **Backend Technologies:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Basic Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Tools and Platforms:** Git, GitHub, VS Code, Postman, Jira

CERTIFICATIONS

- Programming in Data Structures and Algorithms Using Python – NPTEL
- Introduction to Large Language Models – NPTEL
- AI + Sustainability Virtual Internship – IBM SkillsBuild
- Python (Basic) – HackerRank

ACHIEVEMENTS ACTIVITIES

- Solved 70+ Data Structures and Algorithms problems on LeetCode.
- Qualified for the Pre-Final Round of the PES Hackathon focused on Digital Twin Fuel Injection Systems.
- Developed the Aegis AI Scam Detection Application during the Aegis AI Cybersecurity Hackathon.
- Student Mentor involved in peer learning sessions, technical presentations, and academic mentoring activities.

ADDITIONAL INFORMATION

Languages:

English (Professional), Kannada (Native), Telugu, Hindi

Hobbies Interests:

Chess, Cricket, Problem Solving, Puzzles
